

IceCap® Pro²

A SpaceAge Synthetics Product

Promoters, concerts, and sport facilities are demanding the use of more surface area outside of the confines of the ice area. Many buildings use plywood, particle board or hand-built flooring systems to raise this off ice area.

IceCap® Pro² replaces those clunky, difficult to use products, with an engineered solution.

WHAT IS IceCap® Pro²

IceCap® Pro² is an ideal way to build up the off ice and stage areas to be level with your IceCap® Pro floor and ice dam. At 2" thick, IceCap® Pro² will replace multiple layers of plywood or other materials with one single light-weight sheet. Ideal for larger concerts, arena football and other events that require more than just the ice surface for their activities. This flooring system will provide many years of use in active conversion environments.

- Polyurethane, fiberglass-reinforced panels
- 4' X 8' sheets
- Easy to install, clean, and store until the next event
- Encapsulated waffle design provides for excellent insulating properties and a light weight construction when compared to other available 2" thick materials
- Light weight
- Good impact strength
- Highly durable
- The closed cell composite is non-absorbent
- Will not swell, flake or delaminate

IceCap® Pro² product lines are manufactured using the same materials and process as our original WAFFLE composite ice cover. This proven technology has been in use in hundreds of multi-purpose arenas worldwide for over 15 years.

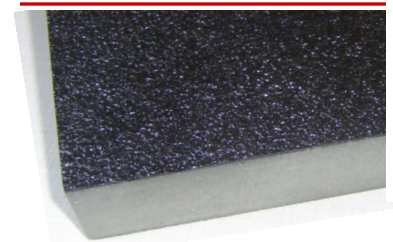

DOUBLE WAFFLE IceCap® Pro² panels are 2" thick X 48" X 96" and weigh only 106lbs.

FASCOAT polyurea coating is offered on one or both sides of IceCap® Pro². Our FASCOAT provides increased wear resistance, improved slip resistance and a superior finished appearance.

IceCap® Pro² is also available in solid 2" thick X 48" X 96 sheets. FASCOAT is the only top surface option available for this product. The solid sheets are used in applications where the outside perimeter of the ice surface needs to be raised to the level of the ice dam and the ice cover, and will not be removed.
